

Knowledge of diesel flat die pellet mill

Diesel flat die pellet mill is a kind of flat die pellet mill, just change the electric motor into diesel engine, to give possibility to move the machine, especially for farmers, they can move the machine to farm and make pellets near raw material.

For the place electricity supply is not good, or three phase electricity is not available, diesel flat die pellet mill is a best choice.

Very easy to operate, only add diesel to the engine, then can start the machine to make pellets.

There is option to add battery to the diesel engine to make the machine easier to start, just turn the key to start the diesel engine.

Diesel flat die pellet mill technical data

Model	Diesel engine Power	Capacity (make wood pellets)	Flat die Φ	Net/Gross Weight	Dimension
120A	8 Hp	40-60Kg/h	120 mm	110/130 Kg	870x440x730xmm
150A	8 Hp	50-90Kg/h	150 mm	120/140 Kg	870x460x730mm
200A	15 Hp	110-140Kg/h	200 mm	270/300Kg	1180x560x950mm
230A	22 Hp	150-190Kg/h	230 mm	280/310Kg	1180x560x950mm
260A	35 Hp	200-280Kg/h	260 mm	450/480Kg	1840x700x1160mm
300A	55 Hp	250-320Kg/h	300 mm	520/560Kg	2200x600x1230mm
360A	55 Hp	300-380Kg/h	360 mm	600/620Kg	2270x620x1260mm
400A	55 Hp	400-500Kg/h	400 mm	750/780Kg	2270x620x1260mm
